

What Regulations Apply to You?

For utilities, networks, generators and suppliers

Mandatory for Uk-headquartered with **250+ employees**. Report **Scope 1 & 2** emissions annually.

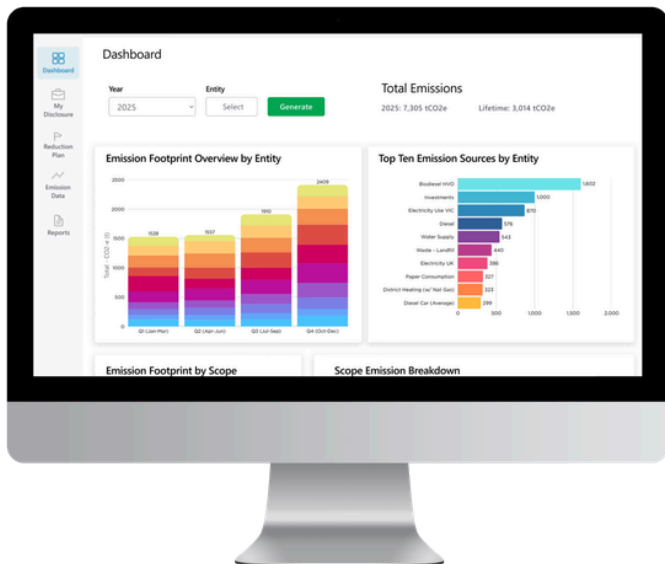

Applies to **large utilities**, with Phase 1 Companies **already reporting** 2024 data in 2025

UK ETS
Mandatory participation. Submit **verified** emissions and activity **reports**. Buy allowances or face **penalties**.

Investor & Regulator Scrutiny

Ofgem, energy regulators, and institutional **investors demand** robust greenhouse gas accounting and climate scenario **analysis**

Existing Data CarbonView Integrates

- Generation mix** (fuel type, output, efficiency)
- Fuel procurement** and **supply chain** data
- On-site operations** (vehicles, emissions sources)
- Customer data** (for Scope 3 scope definition).
- Outsourced services** (waste, energy, contractors)

What CarbonView Delivers for You

Reports in hours, not weeks

Board-ready dashboards, auditable, transparent, CSRD-aligned reporting with ETS-ready emissions data.

UK/EU ETS allowance forecasting

Real-time emissions tracking vs caps; minimize purchase costs £500k+ annually

Network efficiency insights

Pinpoint grid losses; 10-25% cost reduction across assets

Climate scenario analysis ready

Data infrastructure supports CSRD climate scenario submissions

Multi-entity consolidation

Unified view of sites, networks, subsidiaries for C-suite/regulators

One Platform. All Your Data

Set Targets, Monitor Reductions, Measure Savings

Emission Reduction on Autopilot
