

What Regulations Apply to You?

Mandatory if 250+ employees or £36m+ turnover. Report energy and emissions to stakeholders annually.

Mandatory for large manufacturers. Next compliance: **5 December 2027.** Energy assessments every **4 years.**

UK/EU ETS

If you're energy-intensive (power, chemicals, metals, cement), mandatory participation. Buy allowances for verified emissions

Client ESG Demands

Your property clients increasingly require **Scope 1, 2 & 3** reporting and net zero **proof.**

Existing Data CarbonView Integrates

- Energy consumption by source (electricity, gas, fuel)
- Production volumes (tonnes, units)
- On-site generation (solar, CHP) with output data
- Fleet data (vehicle types, fuel, annual mileage)
- Top 20 suppliers and spend (for Scope 3)
- Outsourced services (waste, energy, contractors)

What CarbonView Delivers for You

Cost reduction from efficiency

Identify your biggest energy drains. Typical manufacturers cut energy/fuel spend by 10-20%

ETS compliance & cost management

Verified emissions baseline, activity reports, and allowance tracking. Understand your ETS liability

Protect contracts with major customers

Generate credible Scope 1, 2 & 3 reports. Meet OEM/retail ESG requirements

SBTi & net zero pathways

Data foundation for science-based target validation. Unlock premium supplier status

Audit-ready trails

Every tonne backed by invoices, meters, contracts. Pass customer/investor audits
