

What Regulations Apply to You?

Mandatory for councils with **250+ employees**. Report **Scope 1 & 2** emissions in governance reports. Filing deadline: aligned with annual accounts.

Mandatory for large councils. Next compliance: **5 December 2027**. Failure to comply = **finances up to £1m+**

If you operate **waste facilities** or **district heating**, **mandatory participation**. Direct cost (buy allowances for emissions).

Local Pledges

Most councils have 2030-2050 targets. You need credible, auditable pathways.

Tender & Funding

ESG disclosure increasingly required to access grants and partnerships.

Existing Data CarbonView Integrates

- Building portfolio** (address, floor area, type)
- 12 months of **energy bills** (electricity, gas, heating, by site)
- Fleet data** (vehicle types, fuel, annual mileage)
- Top 20 suppliers** and spend (for Scope 3)
- Outsourced services** (waste, energy, contractors)

What CarbonView Delivers for You

SECR reports in hours, not weeks

Board-ready dashboards, audit-ready trails

ESOS compliance & cost savings

Energy-saving opportunities quantified with ROI. Typical councils find £50k-£500k+ annually

Multi-site consolidation

Manage 50-500+ buildings in one dashboard. Building-level or council-wide roll-up.

Proof for tenders & funders

Credible ESG reports to win contracts and unlock funding.

Automated annually

Once set up, subsequent years run on autopilot (saves 40+ council hours/year).

One Platform. All Your Data

Set Targets, Monitor Reductions, Measure Savings

Emission Reduction on Autopilot
